Executions by Electricists.

LONDON, September 17.—In a discussion before the British association on the subject of electric execution, W. H. Price, chief electrician of the postoffice department said that the act recently passed by the New York legislature providing for the execution of condemned murderers by electricity would have to be rescinded. He claimed that it was impossible to get a current of sufficient intensity to kill a man with certainty. He had experimented with an enormous current and had tried with a spark twenty inches long to kill a pig, but could not. He knew of several instances of persons taking shocks and at the time supposed to have been killed, but were afterwards quite well. He said that sensational reports published in the newspapers about people being killed by shocks from electric wires had upon investigation been found to be nonsense.

Never Before
